WORK EXPERIENCE

- Digital Solution Brand Management Manager - Bayer AG - Global Radiology

March 2023 – May 2024

 - Planned and strategically developed Bayer's radiology digital market research platform, leveraging Google Cloud to enhance business intelligence and data-driven decision-making.
 - Led the digital health portfolio strategy for AI-driven medical imaging solutions, integrating cutting-edge technology into preclinical research workflows.
 - Directed cross-functional projects to ensure digital solutions aligned with global R&D portfolio management goals.
- Radiology Solution Marketing Associate Manager - Bayer AG - Global Radiology

August 2022 – February 2023

 - Drove agile and Scrum operations to optimize global multi-product line imaging workflows (including liver, prostate, etc.).
 - Coordinated with regional teams across 21 countries to promote the IAWS pilot project, integrating software, medical devices, and pharmaceuticals to improve operational efficiency and product synergy.
 - Led the A-map clinical project for liver cancer, aligning the product roadmap with the needs of the APAC and China markets.
- Scientific Specialist - Siemens Healthineers

September 2015 – December 2017

 - Collaborated with cross-functional teams to advance translational medicine research from clinical trials to market promotion.
 - Managed scientific marketing projects, provided technical support, and drove new product development.
 - Led the implementation of the China WIP project, promoting MRI technology and scientific research advancement.
- Senior Application Manager - Bayer Healthcare China

May 2024 – Present

 - Spearheaded clinical development for Bayer's radiology products, creating disease-based integrated solutions to drive business growth.
 - Developed innovative business models to provide comprehensive clinical application and scientific services to clients.
 - Integrated resources to develop clinical digital tools like ROI Calc and Thermostat, enhancing client business performance, and created an AI-powered training chatbot using RAG to improve internal communication efficiency.
- Radiology Marketing Associate - Bayer APAC

December 2021 – July 2022

 - Responsible for the design and implementation of the MRI brand transformation plan in the APAC market, increasing market share and product penetration.
 - Developed and implemented marketing strategies tailored to regional market needs, ensuring successful product launches and market expansion.
- Digital Solution Manager (Concurrent) - Bayer AG - China Radiology

January 2021 – November 2021

 - Led the development and execution of the digital platform product roadmap, laying the foundation for future product launches.
 - Innovated marketing strategies to enhance the company's market position and competitiveness in the digital solutions sector.

SELECTED PROJECTS

Involving Global Management Graduation Program

Selected as a high-potential talent for Bayer's 3-year global rotation program. Gained multi-functional experience across sales & marketing, R&D, service support, customer excellence, and digital solution business in different regions (2022 - 2024). Drove coordination and synchronous operation of multiple value chains, enhancing global strategic alignment.

Crossfunctional Platforming capabilities

Good relationship with Research institutes, Universities & Hospitals, IT partners to build business platform/ecosystem: cooperate with NVIDIA Inc, Tencent, some start-ups, etc. to build platform overarchingly eg. NVIDIA MONAI-based Deep Vein Thrombosis diagnosis framework collaborated with Guangzhou Medical University & Hospitals, etc.

Digital Solution business

leading & steering Chinese digital platform launch team, identify Chinese digital platform roadmap, readiness for the future product implementation; Pave the way for the global digital platforms launching and strategies. invest potential local AI products in China and build collaboration with them based on Bayer's future digital platform.

AI-Powered Marketing Research

Launched marketing research and orchestrated marketplace intelligence by utilizing LLM and Generative AI models, leveraging prompt engineering for content generation and RAG/LangChain for knowledge base maximization.

Radimetrics Application & Development

Responsible for the radiology's digital software, especially the radiation dose management software Radimetrics application & further development in China. Providing consultant & service support for Radimetrics to the customers; orchestrated with global digital solution team's strategies for Chinese software business launching & implementation.

EDUCATION

PhD - Wuhan Institute of Physics and Mathematics, Chinese Academy of Sciences

Magnetic Resonance Imaging & Molecular Imaging Application Development 2011-2015

Bachelor - Wuhan Institute of Technology

Chemical Engineering 2003-2007

TRUTH NOTES

- Do not claim direct radiation therapy product ownership unless later source evidence supports it.
- Do not claim NMPA registration leadership unless later source evidence supports it.
- Do not claim clinical trial start-up ownership, CTA/NDA ownership, signed-deal ownership, or line-management scope unless later source evidence supports it.
